INDEPENDENT AUDITOR'S REPORT

The Honorable Board of Education Southwest Technology Center Altus, Oklahoma

We have audited the accompanying financial statements of the governmental activities, each major fund and the aggregate remaining fund information of Southwest Technology Center School District No. 27 (the District), Altus, Oklahoma, as of and for the year ended June 30, 2012, as listed in the table of contents. These financial statements are the responsibility of the District's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States, and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion the basic financial statements referred to in the first paragraph present fairly, in all material respects, the financial position of the governmental activities, each major fund and the aggregate remaining fund information of the District as of June 30, 2012, and the results of its operations for the year then ended in conformity with accounting principles generally accepted in the United States.

In accordance with *Government Auditing Standards*, we have also issued our report dated February 21, 2013, on our consideration of the District's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts, grants and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be read in conjunction with this report in considering the results of our audit.

Management's Discussion and Analysis is not a required part of the basic financial statements, but is supplementary information the Governmental Accounting Standards Board requires. We applied limited procedures, consisting principally of inquires of management regarding the methods of measurement and presentation of the supplementary information. We did not audit the information and express no opinion thereon.

Our audit was performed for the purpose of forming an opinion on the financial statements of the District. The budgetary comparison schedule and other schedules are presented for purposes of additional analysis and are not a required part of the financial statements. The budgetary comparison schedule and other schedules have been subjected to the auditing procedures applied in the audit of the financial statements and, in our opinion, are fairly stated, in all material respects, in relation to the financial statements taken as a whole.

Management's Discussion and Analysis

Southwest Technology Center

This section of Southwest Technology Center District No. 27 annual financial report presents our discussion and analysis of the District's financial performance during the fiscal year that ended on June 30, 2012. Please read it in conjunction with the District's financial statements that immediately follow this section.

FINANCIAL HIGHLIGHTS

Fiscal year 2012 is the seventh year for the District to comply with reporting requirements under Governmental Accounting Standards Board (GASB) Statements 34, changing the format on the basic financial statements presented. Financial statements may be provided on an accrual, modified accrual, and budgetary basis.

- The District's overall financial status in FY12 continued to increase despite facing the second year of Federal and State reductions. The year began with an increased overall state appropriation for regular operations of \$2,007,976 as compared to \$1,845,901 for regular operations the previous year. This includes a state funding reduction of \$48,721. In addition, the fifth and final year in a planned five years 'formula funding redistribution' among career technology centers represented an increase of \$212,014.
- District property values on which local ad valorem is collected for Southwest Technology Center increased from \$125,802,324 in FY11 to \$134,673,005 in FY12.
- FY12 general fund receipts were \$5,361,908, an increase compared to FY11 receipts which totaled \$4,940,988.
- FY12 general fund expenditures totaled \$4,288,620 which exceeded the FY11 expenditures of \$3,894,449; Expansion of program offerings including, the second year of Mechatronics Technology and implementation of the Biomedical Sciences Program, comprised most of this increase in expenditures.
- The FY12 fund balance forward was \$1,073,280 an increase over the FY11 fund balance forward of \$1,034,370.
- State line item allocation for program funds increase from \$211,902 in FY11 to \$227,447 in FY12. These funds included a one-time OK Education lottery grant in FY11 of 107,400 and FY12 of \$150,000. Both of these grants were for program expansions.
- Federal program funds to the District decreased in FY12 by \$42,862 from \$191,710 in FY11 to \$148,848 in FY12.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction of the Southwest Technology Center District No. 27 basic financial statements. The District's basic financial statements comprise three components: (1) government-wide financial statements, (2) fund financial statements, and (3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves. These statements are organized so the reader can understand Southwest Technology Center District as a financial whole; an entire operating entity.

Government-wide financial statements. The government-wide financial statements are designed to provide readers with a broad overview of the District's finances. While this document contains all funds used by the District to provide programs and activities, the view of the District as a whole looks at all financial transactions and asks the question, "How did we do financially during 2011-2012?"

The statement of net assets presents information on all of the District's assets and liabilities, with the difference between the two reported as net assets. Over time, increases or decreases in net assets may serve as a useful indicator of whether the financial position of the District is improving or deteriorating.

The statement of activities presents information showing how the District's net assets changed during the most recent fiscal year. All changes in net assets are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal period (e.g., uncollected taxes and earned but unused vacation leave).

These two statements report the District's net assets and changes in those assets. This change in net assets is important because it tells the reader that, for the District as a whole, its financial position has improved or diminished. The causes of this change may be the result of many factors; some financial, some not. Non-financial factors include the District's property tax base, current property tax laws in Oklahoma restricting revenue growth, facility conditions, required educational programs, and other factors.

This report also contains other supplementary information in addition to the basic financial statements themselves. These statements are organized so the reader can understand Southwest Technology Center District as a financial whole; an entire operating entity.

The government-wide financial statements can be found on pages 13 and 14.

Fund Financial Statements. A fund is a grouping of related accounts used to maintain control over resources that have been segregated for specific activities or objectives. The District, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the District are considered governmental funds.

Government Funds are used to account for essentially the same functions reported as government activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on *near-term inflows and outflows of spendable resources*, as well as on *balances of spending resources* available at the end of the fiscal year. Such information may be useful in evaluating the District's near-term financing requirements. All of the District's services are included here.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for *governmental funds* with similar information presented for *governmental activities* in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between *governmental funds* and *governmental activities*.

The District maintains two governmental funds; (1) general fund and (2) activity fund. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for the general fund and activity fund. The basic governmental fund financial statements can be found on pages 15 and 16 of this report.

Notes to the financial statements. The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements. Notes to the financial statements begin on page 19.

Other information. In addition to the basic financial statements and accompanying notes, this report also presents certain required supplementary information of the District.

Government-Wide Financial Analysis

Net assets. Recall that the Statement of Net Assets provides the perspective of the District as a whole. See the following schedule of Net assets.

Southwest Technology Center's Net Assets (Millions of Dollars)

	2012	2011
Current and other assets	\$ 1.28	1.25
Capital assets	4.47	4.68
Total Assets	5.75	5.93
Long-term debt outstanding	0.00	0.00
Other liabilities	0.13	0.15
Total Liabilities	0.13	0.15
Net Assets:		
Invested in capital assets, net of debt	4.47	4.68
Restricted	0.68	0.64
Unrestricted	0.47	0.46
Total Net Assets	\$ 5.62	5.78

Change in Net Assets. In the current fiscal year the District's net assets for governmental activities decreased by \$.16 million. The cause of the decrease can be mainly attributed to recording depreciation expense.

Changes in Southwest Technology Center's Net Assets (Millions of Dollars)

	2012	2011
Revenues		
Rogram revenues		
Charges for services	0.34	0.33
grants and reimbursements	0.16	0.22
General revenues

Other uses	0.02	0.02
Depreciation-unallocated	0.39	0.37
Total expenses	4.38	4.22
Decrease in net assets	(0.16)	(0.31)

Activity Funds. FY12 closed activity funds with a balance of \$60,136 while FY11 yielded a fund balance of \$56,573.27. All activity accounts within this fund are closed at the end of each fiscal year and re-established at the beginning of the new fiscal year; with such actions, plans, and changes for funds' use coming before the Board of Education for review and approval.

Factors Bearing on the District's Future

- Total general fund revenues collected exceeded the approved and budgeted appropriations. Total collected general fund revenues for FY12 were \$5,361,908 compared to a budget appropriation of \$5,009,292; FY11 comparative figures were \$4,940,988 with an appropriation of \$4,617,025
- The fund balance forward increased from \$1,034,370 in FY11 to \$1,073,280 in FY12.
- FY12 general fund expenditures totaled \$4,288,620 which exceeded the FY11 expenditures of \$3,894,449; new program offerings and program expansion being the primary reasons.
- Southwest Technology Center relies upon the fund balance to operate until state and local revenues begin to flow for the ensuing fiscal year, usually in December. Additionally, the substantial fund balance prevents unprecedented cuts in state funds, as occurred in FY02 and FY03, from having disastrous effects on the stability of operations. State budget cuts have been realized in FY10 through FY12 however "funding reallocation" offset the burden of these cuts. Federal Program funding decreased in FY12 and is a concern for FY14.
- There is no building or sinking fund to address capital expenditures or repairs. Therefore, management must build and maintain an adequate fund balance to cover capital needs such as program expansions, large equipment replacements/purchases, transportation vehicles, and repairs to structures and infrastructure systems.

- Southwest Technology Center has two buildings on its main campus; both in good repair. The Aviation and Aerospace Program originally was located at Quartz/Altus Regional Airport in Hangar 33 through a ten-year lease with the City of Altus. In May 2008, The Oklahoma Legislature awarded a \$1 million dollar appropriation to Southwest Technology Center through HB1288 for the purchase of Hangar 33 to be used for the expansion of the Aviation and Aerospace Program. On March 9th, 2009 a bill of sale for Hanger 33 and a ground lease for the land the hanger sets on were executed. Southwest Technology Center took possession of Hanger 33 on that date.
- Facilities owned are meeting current needs of Southwest Technology Center, however, they are aging and upgrading and repairs will be expected. Replacement of carpeting began in FY11. To date approximately 50% of the carpets have been replaced in the highest traffic areas including all hallways, the main office areas, three classrooms and the Seminar Center. Classroom and offices will continue to be recarpeted as needed. Considerable repairs have been made to the aging HVAC system and replacement of this system will be a future concern.
- The May 2005 announcement of BRAC (Base Realignment and Closing) by the Department of Defense was positive for our service area with Altus Air Force Base (AAFB) remaining open. However, the move of the C-5A aircraft to San Antonio, Texas affected employment opportunities, and thus enrollment, for two SWTC programs; Aviation and Aerospace, and Simulator Maintenance. New missions have been projected for AAFB but have not been realized. The Simulator Maintenance Program was reevaluated in FY10 and expanded to Mechatronics. The expansion of the Aviation and Aerospace Technology Program to include Power Plant has been embraced by AAFB and enrollment from prior aviation students employed at AAFB has been positive. Federal Budget cuts have placed concerns on the employment opportunities at AAFB in FY13.
- Altus Air Force Base (AAFB) civilian personnel services began outsourcing their computer training, supervisory training, and professional development training for their employees through Southwest Technology Center in FY09. This client based training proved to be substantial in FY09 through FY12. It is expected that Federal Budget cuts will adversely affect this training opportunities in FY14.
- Southwest Technology Center operates training programs in technology that require the latest in equipment; both for replacement and new purchases as the standards change in the world of business and industry. Effective training can only be achieved on industry specific equipment and technology.
- Southwest Technology Center has no capital debt.

Economic Factors. Southwest Technology Center is comprised of the communities and school districts of Granite in Greer County and Blair, Navajo, Altus, Duke, Eldorado, and Olustee in Jackson County. It is a relatively stable area with an economy steeped in agra-business. Altus

Air Force Base is the largest employer in the District, with Bar S meat manufacturing in Altus, American Gypsum in Duke, and Jackson County Memorial Hospital being major employers. The absence of Altus Air Force Base on the BRAC list (Base Realignment and Closing) by the Department of Defense in May 2005, was the catalyst for economic growth in the District.

Since the BRAC announcement, a chain restaurant, two fast food chains, two locally owned restaurants have been opened; three new motels have been constructed, a national chain pharmacy opened; a new auto dealership had its grand opening in 2007; and several new housing additions have been completed. Many of the historic buildings on the downtown square of Altus were renovated and new retail stores were established. All of this economic good news promises some growth in future ad valorem receipts. The spurred economy generated renovations and upgrades in the community including a maps project for Altus High School and City Offices. A new DHS building was also built.

There is a Tax Increment Financing (TIF) zone within the district. It includes the recent expansion and renovation of Bar S meat production plant, as well as a new motel, new farm implement business, rental equipment business, and the new auto dealership. The anticipated payoff time for the TIF is ten (10) to fifteen (15) years which will prohibit additional district revenues from growth in ad valorem in the southeast area of Altus, surrounding the industrial park on which Bar S is located. It will not decrease revenues but will prevent growth in receipts from that area during the TIF period.

The ACE Initiative implemented by the Oklahoma State Legislature increased academic standards and is crowding the average secondary students' schedule, making it increasingly difficult to choose attendance at Southwest Technology Center in their high school schedule. This is of growing concern for the future success of Southwest Technology Center to serve secondary students. Most programs currently are evenly split between secondary and adult students. Secondary students are required to maintain area support of SWTC.

Cooperative Alliances with both Western Oklahoma State College and Oklahoma State University at Okmulgee with Southwest Technology Center might yield greater incentives to secondary students to attend, allowing them to earn portable college hours while still in high school. Adult enrollment remains stable, comprising approximately 45% of total fulltime enrollment.

Increased State legislated mandates in curricula matters, use of limited fiscal resources, and a pattern of declining enrollment in all partner school districts are at some future point anticipated to impact the Southwest Technology Center District. Population in all southwest Oklahoma communities has continued to decline.

An increase in state mandates regarding salary increases, retirement benefits, and health insurance coverage, as well as curricular matters which affect secondary students, are concerns to the District. Health care reform has mandated three additional employees to be covered by Health Insurance benefits beginning January 2014. In addition, the popular push in recent years to lower taxes continues as a concern to the District as revenue resources are affected.

In FY06 and FY07, a committee of Technology Center representatives and Oklahoma Department of Career and Technology Education personnel brought about positive changes in the funding formula used to allocate state appropriated funds to the smaller Technology Centers in the state. Southwest Technology Center was a benefactor to this reallocation of state funds for a five year phase in period which was projected to yield a \$145,928 yearly increase of state funding in each the FY08-FY12 funding years for a total increase in yearly allocation at the end of FY12 of \$729,640, Actual growth from this reallocation was better than projected. As a result of the change in funding formula, FY12 began with Southwest Technology Center receiving the fifth incremental increases of \$212,014.00 in state formula operational funds. The funding redistribution for FY08-FY12 yielded an increase of \$994,264 increase over the FY07 funding allocation. Oklahoma Department of Career and Technology Education announced that this layered reallocation of funding will continue for the FY13 school year. The first order of business was be to meet the increased salary schedules and increased cost of benefits, including the escalating percentages of Oklahoma Teacher Retirement. The second order of business was to expand the training programs available at Southwest Technology Center. Cosmetology, Mechatronics Technology, Aviation Power plant, and Biomedical Sciences have been added to our program offerings.

Capital Assets

During FY12 the District added to capital assets in the form of expansion of the second year of the Mechatronics Technology Program Equipment and implementation of the Biomedical Sciences Program. There is an on-going need within the District to stay abreast of current technologies within training programs. Facilities upgrades and repairs to the building continued in FY12, including replacement of a compressors on the main building's HVAC system, new carpeting to approximately 50% of the main campus facility. Future repairs and upgrades in the planning stages include continuation of replacement of carpet in the main building, repair or replacement of wallpaper throughout the building, energy savings updates to comply with SB1096.

Long-Term Debt

At year-end the District had no long-term debt outstanding through the bond issuance process. There are no plans to obligate the district in the near future.

Factors Bearing on the District's Future

FY07 brought new challenges with increased salary schedules, increased health insurance premiums, and increased rates in Oklahoma Teacher Retirement mandated upon the district. It also brought good news with the adoption of the new funding formula within the Oklahoma Department of Career and Technology Education for technology centers which will benefit SWTC with increased appropriations for ensuing years. FY08 brought the realization of new funding from the ODCTE formula change which was anticipated to continue through FY12 for a total of five years' steady increase under the planned re-distribution formula. In FY11, it was

announced that the current funding redistribution would continue for one more year and then a new system of redistribution would be established for years forward from there.

The additional state revenues received by SWTC through the redistribution formula allowed salary schedules to grow for the years FY08-FY10, which were direly needed. SWTC had held the bottom of the salary schedule among all technology centers uncontested for too long. FY10 the salary schedule remained consistent while new programs were being implemented. FY 11 brought slight salary increases for certified/professional personnel and considerable increases for support personnel. The support personnel pay scale was adjusted to allow step increases on a yearly basis instead of the traditional 5 year step increase on prior schedules. Now all salaried employees will receive a yearly step increase. FY12 salary schedule remained consistent only allowing for step increases after 25 years of service. Employees with more than 25 years of service will now realize a step increase where they have not in years past.

The anticipated growth in revenues through 2012 gives hope to competitive salary schedules, the attraction and retention of effective faculty/staff, and the expansion of programs. Continued growth in the contribution rate required of districts for participation in the Oklahoma Teacher Retirement State system is a continuing concern, new Health care reform mandates, along with the growing premiums for participation in HealthChoice insurance. State funds must continue to be received to meet future mandated increases and the accompanying payroll burdens in order to maintain fiscal stability.

Program expansions must be carefully planned by the Board and Administration cognizant of infrastructure limitations. The absence of a building fund and hesitancy to call for a bond election for capital improvements combine to necessitate prudent planning for any change in programs.

At this time the Board and administration in the District are confident that with careful financial planning, close scrutiny of activities, and continued prudent fiscal management, the District can continue to expand services to the students and communities that comprise the District.

Contacting the School District's Financial Management

This financial report is designed to provide our citizen's taxpayers, investors and creditors with a general overview of the District's finances and to demonstrate the District's accountability for the money it receives. Questions about this report or additional information may be received by contacting the Administrative Office, Southwest Technology Center District 27, 711 W. Tamarack, Altus, Oklahoma 73521.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Reporting Entity

Southwest Technology Center School District No. 27 (the District) is a corporate body for public purposes created under Title 70 of the Oklahoma Statutes and accordingly is a separate entity for operating and financial reporting purposes. The District is part of the public school system of Oklahoma under the general direction and control of the State Board of Career and Technology Education and is financially dependent on State of Oklahoma support. The general operating authority for the public school system is the Oklahoma School Code contained in Title 70, Oklahoma Statutes.

The governing body of the District is the Board of Education composed of elected members. The appointed superintendent is the executive officer of the District.

In evaluating how to define the District, for financial reporting purposes, management has considered all potential component units. The decision to include a potential component unit in the reporting entity was made by applying the criteria established by the Governmental Accounting Standards Board (GASB). The basic – but not the only - criterion for including a potential component unit within the reporting entity is the governing body's ability to exercise oversight responsibility. The most significant manifestation of this ability is financial interdependency. Other manifestations of the ability to exercise oversight responsibility include, but are not limited to, the selection of governing authority, the designation of management, the ability to significantly influence operations and accountability for fiscal matters. A second criterion used in evaluating potential component units is the scope of public service. Application of this criterion involves considering whether the activity benefits the District and/or its citizens, or whether the activity is conducted within the geographic boundaries of the District and is generally available to its patrons. A third criterion used to evaluate potential component units for inclusion or exclusion from the reporting entity is the existence of special financing relationships, regardless of whether the District is able to exercise oversight responsibilities. Based upon the application of these criteria, there are no potential component units included in the District's reporting entity.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – cont'd

B. Basic Financial Statements

The government-wide financial statements (i.e., the statement of net assets and the statement of activities) report information on all of the non-fiduciary activities of the primary government. For the most part, the effect of inter-fund activity has been removed from these statements. Governmental activities are normally supported by taxes and intergovernmental revenues.

The statement of activities demonstrates the degree to which the direct expenses of a given function or segment are offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function. Program revenues include 1) tuition or fees paid by students or citizens of the District and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function. Taxes and other items, including state aid, that are not classified as program revenues are reported as general revenues.

Fund Accounting

The District uses funds and account groups to report on its financial position and the results of its operations. Fund accounting is designed to demonstrate legal compliance and to aid financial management by segregating transactions related to certain District functions or activities. A fund is a separate accounting entity with a self-balancing set of accounts. An account group, on the other hand, is a financial reporting device designed to provide accountability for certain assets and liabilities that are not recorded in the funds because they do not directly affect net expendable available financial resources. Funds are classified into three categories: Governmental, proprietary and fiduciary. Each category, in turn, is divided into separate "fund types."

Governmental Fund Types

Governmental funds are used to account for all or most of a government's general activities, including the collection and disbursement of earmarked monies (special revenue funds), the acquisition or construction of general fixed assets (capital projects funds), and the servicing of general long-term debt (debt service funds).

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – cont'd

B. Basic Financial Statements - cont'd

General Fund – The general fund is used to account for all financial transactions except those required to be accounted for in another fund. Major revenue sources include state and local property taxes and state funding under the Foundation and Incentive Aid Program. Expenditures include all costs associated with the daily operations of the schools except for programs funded for building repairs and maintenance, school construction and debt service on bonds and other long-term debt. The general fund includes federal and state restricted monies that must be expended for specific programs.

<u>Special Revenue Funds</u> – Special revenue funds include the building fund and the coop fund. The District did not maintain either of these funds during the 2011-12 fiscal year.

<u>Building Fund</u> – The building fund consists mainly of monies derived from property taxes levied for the purpose of erecting, remodeling, repairing, or maintaining school buildings and for purchasing furniture, equipment and computer software to be used on or for school district property, for paying energy and utility costs, for purchasing telecommunications services, for paying fire and casualty insurance premiums for school facilities, for purchasing security systems, and for paying salaries of security personnel.

<u>Co-op Fund</u> – The co-op fund is established when the boards of education of two or more school districts enter into cooperative agreements and maintain joint programs. The revenues necessary to operate a cooperative program can come from federal, state, or local sources, including the individual contributions of participating school districts. The expenditures for this fund would consist of those necessary to operate and maintain the joint programs.

<u>Debt Service Fund</u> – The debt service fund is the District's sinking fund and is used to account for the accumulation of financial resources for the payment of general long-term (including judgments) debt principal, interest and related costs. The primary revenue sources are local property taxes levied specifically for debt service and interest earnings from temporary investments.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – cont'd

B. <u>Basic Financial Statements</u> - cont'd

<u>Capital Projects Fund</u> – The capital projects fund is the District's bond fund and is used to account for the proceeds of bond sales to be used exclusively for acquiring school sites, constructing and equipping new school facilities, renovating existing facilities and acquiring transportation equipment.

Fiduciary Fund Types

Fiduciary funds are used to account for assets held on behalf of outside parties, including other governments, or on behalf of other funds within the District. The terms "non-expendable" and "expendable" refer to whether or not the District is under an obligation to maintain the trust principal. Agency funds generally are used to account for assets that the District holds on behalf of others as their agent and do not involve measurement of results of operation.

<u>Expendable Trust Funds</u> – Expendable trust funds include the gifts and endowments fund, medical insurance fund, workers compensation fund and the insurance recovery fund. The District did not maintain any expendable trust funds during the 2011-12 school year.

<u>Gifts and Endowments Fund</u> – The gifts and endowments fund receives its assets by way of philanthropic foundations, individuals, or private organizations for which no repayment or special service to the contributor is expected. This fund is used to promote the general welfare of the District.

<u>Medical Insurance Fund</u> – The medical insurance fund accounts for revenues and expenditures for all types of self-funded medical insurance coverage.

<u>Workers Compensation Fund</u> – The workers compensation fund accounts for revenues and expenditures for workers compensation claims.

<u>Insurance Recovery Fund</u> – The insurance recovery fund accounts for all types of insurance recoveries, major reimbursements and reserves for property repairs and replacements.

<u>Agency Fund</u> – The agency fund is the school activities fund which is used to account for monies collected principally through the fundraising efforts of students and District-sponsored groups. The administration is responsible, under the authority of the Board, for collecting, disbursing and accounting for these activity funds.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – cont'd

B. Basic Financial Statements - cont'd

Account Groups

GASB 34 eliminates the presentation of account groups but provides for these records to be maintained and incorporates the information into the governmental column in the government-wide statement of net assets.

Total Column

The total column on the government-wide and fund financial statements are presented only to facilitate financial analysis. Data in this column does not present financial position or results of operations in conformity with generally accepted accounting principles. Neither is such data comparable to a consolidation.

C. Measurement Focus and Basis of Accounting

Basis of accounting refers to when revenues and expenditures are recognized in the financial statements and relates to the timing of the measurements made regardless of the measurement focus applied.

The government-wide financial statements are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Property taxes are recognized as revenues in the year for which they are levied. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Governmental fund financial statements are reported using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized as soon as they are both measurable and available. Revenues are considered to be available when they are collectible within the current period or soon enough thereafter to pay liabilities of the current period. Property taxes are considered to be available if collected within 30 days of the fiscal year end. For this purpose, the District considers revenues, other than property taxes, that are susceptible to accrual to be available if they are collected within 60 days of the end of the current fiscal period. Expenditures are generally recorded when a liability is incurred, as under accrual accounting. However, expenditures relating to compensated absences, claims and judgments, are recorded only when payment is due. Some other significant differences are as follows:

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – cont'd

C. Measurement Focus and Basis of Accounting – cont'd

Revenues and expenditures are reported by the budget year until all encumbrances have been paid and unexpended appropriations are closed to the current year fund balance.

The general and building funds record purchases of supplies as expenditures rather than as assets to be expensed when used.

Encumbrances are reported as liabilities. Under generally accepted accounting principles, open encumbrances for which goods or services have not been received are reported as reservations of fund balances, since the commitments will be honored through subsequent year's budget appropriations.

Vested or accumulated vacation leave that is expected to be liquidated with expendable available financial resources is not reported as an expenditure and a fund liability of the governmental fund that will pay it. In addition, the non-current portion of vested accumulated vacation is not recorded in the general long-term debt account group.

Capital leases are recorded as expenditures. Under generally accepted accounting principles, capital leases are normally capitalized as a fixed asset and recorded in the general long-term debt account group.

D. Budgets and Budgetary Accounting

The District is required by state law to prepare an annual budget. A preliminary budget must be submitted to the Board of Education by December 31, for the fiscal year beginning the following July 1. If the preliminary budget requires an additional levy, the District must hold an election on the first Tuesday in February to approve the levy. If the preliminary budget does not require an additional levy, it becomes the legal budget. If an election is held and the taxes are approved, then the preliminary budget becomes the legal budget. If voters reject the additional taxes, the District must adopt a budget within the approved tax rate.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – cont'd

D. <u>Budgets and Budgetary Accounting</u> – cont'd

A budget is legally adopted by the Board of Education for all funds (with the exception of the trust and agency funds) that includes revenues and expenditures.

The 2011-12 Estimate of Needs was not amended by supplemental appropriations during the fiscal year.

Encumbrances represent commitments related to unperformed contracts for goods or services. Encumbrance accounting – under which purchase orders and other commitments of resources are recorded as expenditures of the applicable fund – is utilized in all governmental funds of the District. Unencumbered appropriations lapse at the end of each fiscal year.

E. Assets, Liabilities and Fund Equity

<u>Cash</u> – Cash consists of cash on hand, demand deposit accounts, and interest bearing checking accounts.

<u>Investments</u> – The District is allowed to invest in direct obligations of the United States government and agencies; certificates of deposit of savings and loan associations, banks and trust companies; savings accounts or savings certificates of savings and loan associations, and trust companies; and warrants, bonds or judgments of the District. All investments are recorded at cost, which approximates market value.

<u>Inventories</u> – The value of consumable inventories at June 30, 2012, is not material to the combined financial statements.

<u>Capital Assets and Property, Plant and Equipment</u> – Capital assets, which include land, building, building improvements and equipment are reported in the government-wide financial statements. Land, buildings and building improvements are recorded at historical cost or estimated historical cost if purchased or constructed. The capitalization threshold for equipment and fixtures is \$5,000. Donated capital assets are recorded at estimated fair market value at date of donation.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – cont'd

E. Assets, Liabilities and Fund Equity – cont'd

The costs of normal maintenance and repairs that do not add to the value or utility of the asset or materially extend asset lives are not capitalized.

Building and building improvements, and equipment and fixtures are depreciated using the straight-line method beginning in the year they are placed into service. The District's capital assets have the following estimated useful lives:

Assets	Years
Buildings and building improvements	30
Equipment and fixtures	5-15
Vehicles	5

<u>Warrants Payable</u> – Warrants are issued to meet the obligations for goods and services provided to the District. The District recognizes a liability for the amount of outstanding warrants that have yet to be redeemed by the District's treasurer.

<u>Encumbrances</u> – Encumbrances represent commitments related to purchase orders, contracts, other commitments for expenditures or resources, and goods or services received by the District for which a warrant has not been issued. An expenditure is recorded and a liability is recognized for outstanding encumbrances at year end in accordance with the budget basis of accounting.

<u>Unmatured Obligations</u> – The District had no unmatured obligations at June 30, 2012.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – cont'd

E. Assets, Liabilities and Fund Equity – cont'd

Compensated Absences – The District reports compensated absences in accordance with provisions of GASB Statement No. 16, *Accounting for Compensated Absences*. Vacation leave is accrued as a liability as the benefits are earned by the employees if the employees' rights to receive compensation are attributable to services already rendered and it is probable that the District will compensate the employees for the benefits through paid time off or some other means, such as cash payments at termination or retirement. Sick leave is calculated using the vesting method. The balance reflects sick leave accumulated at the balance sheet date by those employees who are currently eligible to receive termination payments as well as other employees who are expected to become eligible in the future to receive such payments. The accrual has been reduced to the maximum amount allowed by the District's policy as a termination payment.

<u>Funds Held for School Organizations</u> – Funds held for school organizations represent the funds received or collected from students or other cocurricular and extracurricular activities conducted in the District, control over which is exercised by the board of education. These funds are credited to the account maintained for the benefit of each particular activity within the school activity fund.

<u>Long-Term Debt</u> – Long-term debt is recognized as a liability of a governmental fund when due, or when resources have been accumulated in the debt service fund for payment early in the following year. For other long-term obligations, only that portion expected to be financed from expendable, available financial resources is reported as a fund liability of a governmental fund. The remaining portion of such obligations is reported in the general long-term debt account group.

<u>Restricted Fund Balance</u> – The Building Fund is restricted by statute to certain capital related costs, its fund balance is shown as restricted.

<u>Committed Fund Balance</u> – The District has committed a portion of fund balance in both the General and Building Fund for funding the cash flow needs during the first half of each fiscal year. The collection of property taxes occurs mainly in December through March. This creates a temporary cash flow deficit during the first part of each fiscal year. The committed fund balance is used to finance this temporary cash flow deficit.

<u>Assigned Fund Balance</u> – The District assigns a portion of Fund Balance to honor the obligations made by the District for encumbrances (purchase orders) for which goods or services have not yet been received.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – cont'd

E. Assets, Liabilities and Fund Equity – cont'd

<u>Unassigned Fund Balance</u> - Fund balance represents the funds not restricted in use by Statute nor encumbered by purchase orders, legal contracts.

F. Revenue and Expenditures

<u>Local Revenues</u> – Revenue from local sources is the money generated from within the boundaries of the District and available to the District for its use. The District is authorized by state law to levy property taxes, which consist of ad valorem taxes on real and personal property within the District. These property taxes are distributed to the District's general, building and sinking funds based on the levies approved for each fund. The County Assessor, upon receipt of the certification of tax levies from the county excise board, extends the tax levies on the tax rolls for submission to the county treasurer prior to October 1. The county treasurer must commence tax collection within fifteen days of receipt of the tax rolls. The first half of taxes is due prior to January 1. The second half is due prior to April 1.

If the first payment is not made in a timely manner, the entire tax becomes due and payable on January 2. Second half taxes become delinquent on April 1, of the year following the year of assessment. If not paid by the following October 1, the property is offered for sale for the amount of taxes due. The owner has two years to redeem the property by paying the taxes and penalty owed. If at the end of two years the owner has not done so, the purchaser is issued a deed to the property.

Other local sources of revenues include tuition, fees, rentals, disposals, commissions and reimbursements.

<u>Intermediate Revenues</u> - Revenues from intermediate sources are the amounts of money from funds collected by an intermediate administrative unit, or a political subdivision between the District and the state, and distributed to Districts in amounts that differ in proportion to those which are collected within such systems.

<u>State Revenues</u> – Revenues from state sources for current operations are primarily governed by the state vocational-technical program formula and equalization formula under the provisions of Article XIV, Title 70, Oklahoma Statutes. The State Board of Career and Technology Education administers the allocation of these formulas.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – cont'd

F. Revenue and Expenditures – cont'd

The District receives revenue from the state to administer certain categorical educational programs. State Board of Career and Technology Education rules require that revenue earmarked for these programs be expended only for the program for which the money is provided and require that the money not expended as of the close of the fiscal year be carried forward into the following year to be expended for the same categorical programs. The State Department of Career and Technology Education requires that categorical educational program revenues be accounted for in the general fund.

The aforementioned state revenues are apportioned to the District's general fund.

<u>Federal Revenues</u> – Federal revenues consist of revenues from the federal government in the form of operating grants or entitlements. An operating grant is a contribution to be used for a specific purpose, activity or facility. A grant may be received either directly from the federal government or indirectly as a passthrough from another government, such as the state.

An entitlement is the amount of payment to which the District is entitled pursuant to an allocation formula contained in applicable statutes.

The majority of the federal revenues received by the District are apportioned to the general fund.

<u>Interest Earnings</u> – Represent compensation for the use of financial sources over a period of time.

<u>Non-Revenue Receipts</u> – Non-revenue receipts represent receipts deposited into a fund that are not new revenues to the District, but the return of assets.

<u>Instruction Expenditures</u> – Instruction expenditures include the activities dealing directly with the interaction between teachers and students. Teaching may be provided for students in a school classroom, in another location, such as a home or hospital, and in other learning situations, such as those involving cocurricular activities. It may also be provided through some other approved medium, such as television, radio, telephone and correspondence. Included here are the activities of teacher assistants of any type (clerks, graders, teaching machines, etc.) which assist in the instructional process. The activities of tutors, translators and interpreters would be recorded here. Department chairpersons who teach for any portion of time are included here. Tuition/transfer fees paid to other LEAs would be included here.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – cont'd

F. Revenue and Expenditures – cont'd

<u>Support Services Expenditures</u> – Support services expenditures provide administrative, technical (such as guidance and health) and logistical support to facilitate and enhance instruction. These services exist as adjuncts for fulfilling the objectives of instruction, community services and enterprise programs, rather than as entities within themselves.

<u>Operation of Non-Instructional Services Expenditures</u> – Activities concerned with providing non-instructional services to students, staff or the community.

<u>Facilities Acquisition and Construction Services Expenditures</u> – Consist of activities involved with the acquisition of land and buildings; remodeling buildings; the construction of buildings and additions to buildings; initial installation or extension of service systems and other built-in equipment; and improvements to sites.

Other Outlays Expenditures – A number of outlays of governmental funds are not properly classified as expenditures, but still require budgetary or accounting control. These are classified as Other Outlays. These include debt service payments (principal and interest).

Other Uses Expenditures – This includes scholarships provided by private gifts and endowments; student aid and staff awards supported by outside revenue sources (i.e., foundations). Also, expenditures for self-funded employee benefit programs administered either by the District or a third party administrator.

<u>Repayment Expenditures</u> – Repayment expenditures represent checks/warrants issued to outside agencies for refund or restricted revenue previously received for overpayment, non-qualified expenditures and other refunds to be repaid from District funds.

<u>Interfund Transactions</u> – Quasi-external transactions are accounted for as revenues, expenditures or expenses. Transactions that constitute reimbursements to a fund or expenditures/expenses initially made from it that are properly applicable to another fund, are recorded as expenditures/expenses in the fund that is reimbursed.

All other interfund transactions, except quasi-external transactions and reimbursements, are reported as transfers. Nonrecurring or nonroutine permanent transfers of equity are reported as residual equity transfers. All other interfund transfers are reported as operating transfers. There were no residual equity transfers nor operating transfers made during the current fiscal year.

2. CASH AND INVESTMENTS

The District's investment policies are governed by state statute. Permissible investments include direct obligations of the United States government and agencies; certificates of deposit of savings and loan associations, banks and trust companies; savings accounts or savings certificates of savings and loan associations, banks, and trust companies; and warrants, bonds or judgments of the District.

<u>Cash</u> – The District's bank balance of deposits and cash pools at June 30, 2012, was \$1,557,423. Custodial credit risk is the risk that in the event of a bank failure, the District's deposits may not be returned to it. State statutes require collateral for amounts in excess of federally insured amounts. The District's policy requires collateral equal to 110% of the deposit amount for all deposits not covered by F.D.I.C. insurance. The bank balance was completely covered by federal depository insurance and by collateral held by the District's third party agent in the District's name.

<u>Investments</u> – At June 30, 2012, the District's investments consisted certificates of deposits and of investment pools (sweep accounts) invested in money market funds.

Interest rate risk – Interest rate risk is the risk that changes in interest rates will adversely affect the fair market value of an investment. Due to the required liquidity for those investments, these funds have no defined maturity dates. The District does not have a formal policy that limits investment maturities as a means of managing its exposure to fair value losses form increasing interest rates.

Credit risk – Investments – Credit risk is the risk that the issuer or other counterparty to and investment will not fulfill its obligations. Investments held by the District in investment pools (sweep accounts) are considered unclassified as to custodial credit risk because they are not evidenced by securities that exist in physical or book entry form. These investments are held with various banks, and are rated AAA by Standard and Poor's. The District does not have a formal policy limiting its exposure arising from concentration of investments.

3. CAPITAL ASSETS AND PROPERTY, PLANT AND EQUIPMENT

Capital assets activity for the year ended June 30, 2012, was as follows:

Class	
Governmental Activities:	
Buildings	\$ 7,183,001
Airplane and airplane engine	55,750
Flight simulator	973,881
Equipment	591,440
Vehicles	269,601
Totals	9,073,673
Less Accumulated Depreciation:	(4,601,916)
Grand Totals	\$ 4,471,757

4. INTERFUND RECEIVABLES AND PAYABLES

There were no interfund receivables or payables at June 30, 2012.

5. GENERAL LONG-TERM DEBT

State statutes prohibit the District from being indebted in an amount exceeding the revenue to be received for any fiscal year without approval by the District's voters. Bond issues have been approved by the voters and issued by the District for various capital improvements. These bonds are required to be fully paid serially within 25 years of the date of issue.

The District has no outstanding debt as of June 30, 2012

6. EMPLOYEE RETIREMENT SYSTEM

Description of Plan

The District participates in the state-administered Oklahoma Teachers' Retirement System, which is a cost sharing, multiple-employer defined benefit public employee retirement system (PERS), which is administered by the Board of Trustees of the Oklahoma Teachers' Retirement System (the "System"). The System provides retirement and disability benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries. Title 70 Section 17 of the Oklahoma Statutes establishes benefit provisions and may be amended only through legislative action. The Oklahoma Teachers' Retirement System issues a publicly available financial report that includes financial statements and required supplementary information for the System. That report may be obtained by writing to the Oklahoma Teachers' Retirement System, P.O. Box 53624, Oklahoma City, OK 73152, or by calling 405-521-2387.

Basis of Accounting

The System's financial statements are prepared using the cash basis of accounting, except for accruals of interest income. Plan member contributions are recognized in the period in which the contributions are made. Benefits and refunds are recognized when paid. The pension benefit obligation is a standardized disclosure measure of the present value of pension benefits. This pension valuation method reflects the present value of estimated pension benefits that will be paid in future years as a result of employee services performed to date and is adjusted for the effect of projected salary increases. There are no actuarial valuations performed on individual school districts. The System has an under-funded pension benefit obligation as determined as part of the latest actuarial valuation.

Funding Policy

The District, the State of Oklahoma, and the participating employee make contributions. The contribution rates for the District and its employees are established by and may be amended by Oklahoma Statutes. The rates are not actuarially determined. The rates are applied to the employee's earnings plus employer-paid fringe benefits. The required contribution for the participating members is 7.0% of compensation. The District is required to contribute 10.5% of applicable compensation reduced by revenues the System received from the natural gas tax. Contributions received by the System from the State of Oklahoma are used to offset required employer contributions by the local school district. The District contributed 9.0% (which increased to 9.50% on January 1, 2012) and the State of

6. EMPLOYEE RETIREMENT SYSTEM – cont'd

Funding Policy - cont'd

Oklahoma contributed the remaining amount during this year. The District is allowed by Oklahoma Teachers' Retirement System to make the required contributions on behalf of the participating members. In addition, if a member's salary is paid in part by federal or private funds, the contribution on that portion of the salary paid by those funds must be matched by the District at 7.00%

Annual Pension Cost

The District's total contributions for 2012, 2011 and 2010 were \$334,584, \$322,058, and \$301,433, respectively.

Ten year historical trend information is presented in the Teacher's Retirement System of Oklahoma Annual Report for the year ended June 30, 2012. This information is useful in assessing the pension plan's accumulation of sufficient assets to pay pension benefits as they become due.

7. RISK MANAGEMENT

The District is exposed to various risks of loss related to torts; theft of, damage to and destruction of assets; errors and omissions; injuries to employees; or acts of God. The District purchases commercial insurance to cover these risks, including general and auto liability, property damage, and public officials liability. Settled claims resulting from risks have not exceeded the commercial insurance coverage in any of the past three fiscal years.

8. CONTINGENCIES

Litigation

School officials are not aware of any pending or threatened litigation, claims, or assessments or unasserted claims or assessments against the District.

8. CONTINGENCIES – cont'd

Schedule of Expenditure of Federal Awards

The schedule shows the federal awards received and expended by he District during the 2011-12 fiscal year. The revised OMB Circular A-133 *Audits of States, Local Governments and Non-Profit Organizations*, established uniform audit requirements for nonfederal entities which expended more than \$500,000 in federal awards.

Amounts received or receivable from grant agencies are subject to audit and adjustment by grantor agencies. Any disallowed claims, including amounts already collected, may constitute a liability of the applicable funds. The amounts, if any, of expenditures which may be disallowed by the grantor cannot be determined at this time, although the District expects such amounts, if any, to be immaterial.

9. GASB STATEMENT No. 54

The Governmental Accounting Standards Board issued Statement No. 54, Fund Balance Reporting and Governmental Fund Type Definitions, which became effective for periods beginning after June 15, 2010. This statement establishes fund balance classifications that comprise a hierarchy based primarily on the extent to which a government is bound to observe constraints imposed upon the use of the resources reported in governmental funds. The statement provides for the classification as restricted, committed, assigned and unassigned based on the relative strength of the constraints that control how specific amounts can be spent.

SOUTHWEST TECHNOLOGY CENTER COMBINED STATEMENT OF REVENUES COLLECTED, EXPENDITURES AND CHANGES IN CASH FUND BALANCES - BUDGETED GOVERNMENTAL FUND TYPES - BUDGET BASIS FOR THE YEAR ENDED JUNE 30, 2012

REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STANDARDS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

The Honorable Board of Education Southwest Technology Center Altus, Oklahoma

We have audited the combined financial statements of Southwest Technology Center (the Center), Altus, Oklahoma, as of and for the year ended June 30, 2012, and have issued our report thereon dated February 21, 2013. We conducted our audit in accordance with auditing standards generally accepted in the United States, and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States.

Internal Control Over Financial Reporting

Management of the District is responsible for establishing and maintaining effective internal control over financial reporting. In planning and performing our audit, we considered the Center's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Center's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the Center's internal control over financial reporting.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or a combination of deficiencies, in internal control such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected on a timely basis.

Our consideration of internal control over financial reporting was for the limited purpose described in the preceding paragraph and would not necessarily identify all deficiencies in internal control over financial reporting that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Center's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance that are required to be reported under *Government Auditing Standards*.

This report is intended solely for the information and use of management and is not intended to be, and should not be, used by anyone other than these specified parties.
