US-CHINA TRADE ESCALATION

The US proposes 25% tariffs on \$50B of Chinese goods totaling 1300 products (Implemented in July)	April	Retaliatory tariffs of ~\$3B worth of US exports. In response to implementation of US tariffs in Q1 on solar panels, washing machines, steel, and aluminum
US appears to reach broad agreement with China and holds off on additional tariffs. Agreement is never finalized.	May	China offers to cut import duties on cars and remove tariffs on US farm products
US restricts Chinese acquisition of US firms with sensitive technology US threatens tariffs on another \$200 billion worth of Chinese goods	June	China details tariff on \$50 billion worth of exports on 659 US goods in response to the US April announcement (Implemented in July)
25% tariff levied on \$34 billion of imports from China with tariffs expected on another \$16 billion in two weeks. Potential tariffs on \$200B worth of imports from China is announced with possible implementation in late Q3	July	China responds with tariffs of 25% on \$34 billion worth of US exports with soybeans being a sizable target. Tariffs on \$16 billion worth of goods dependent on US response. Micro Technology ordered to temporarily halt sales in China due to a patent dispute

US-CHINA TRADE: POTENTIAL OUTCOMES

Outcome	Description	Implications
Base Case: Elevated Tariffs and/or Trade Limitations	A “cold war” in the ongoing “trade battle” between the US and China	<ul style="list-style-type: none"> - Tariffs and restrictions on trade are implemented – leading to marginally higher inflation and marginally lower growth rates - Equity and currency volatility is elevated, but valuations may provide attractive investment opportunities
Favorable Case: Negotiated Settlement	The US and China agree to a mutually beneficial pact	<ul style="list-style-type: none"> - Some tariffs or trade limitations may be implemented, but the pact allows for broader access to local China and US markets for each nation - Volatility may persist throughout negotiations, though this is the most appealing outcome for global equities
Tail Risks: US – China Trade War	The countries escalate to implementing more severe protectionist policies	<ul style="list-style-type: none"> - Results in destabilization of global equity markets and the global economy - It would likely result in a global recession as economic growth rates are hampered with the potential for stagflation
Full-Blown Trade War	Other countries become involved levying additional tariffs and materially reducing global trade flows (e.g. 1930s style global trade restrictions)	<ul style="list-style-type: none"> - Investors are encouraged to rebalance to “safe haven” fixed-income exposure, such as TIPS and government debt

BEYOND US-CHINA TRADE

- **Should dynamics shift toward the tail-risk outcomes, there are other important aspects of the United States' role in the global economy that should be considered:**

Chinese Ownership of US Treasuries

Measured about \$1.2T at the end of 2017

Provides some leverage if China threatened to sell

However, materially reducing Treasuries could negatively impact the Yuan

Degree of Political Control

Known political stability affords China the opportunity to take a harsher negotiation posture

China can effectively control local sentiment if needed – for example, to implement boycotts on American goods

Yuan Devaluation

Competitiveness of goods and exports would increase

However, could trigger large capital outflows from China. Likely requires capital controls, which runs counter to goal of opening local financial markets

Currency Reserves

The USD status as a reserve currency allows it to benefit from safe-haven flows that could result from a reduction in trade

This status could be jeopardized if other key countries shift reserves elsewhere

US Companies Operating Internationally

Companies such as Apple, Disney, or Nike could face additional hurdles from the Chinese government to operate locally

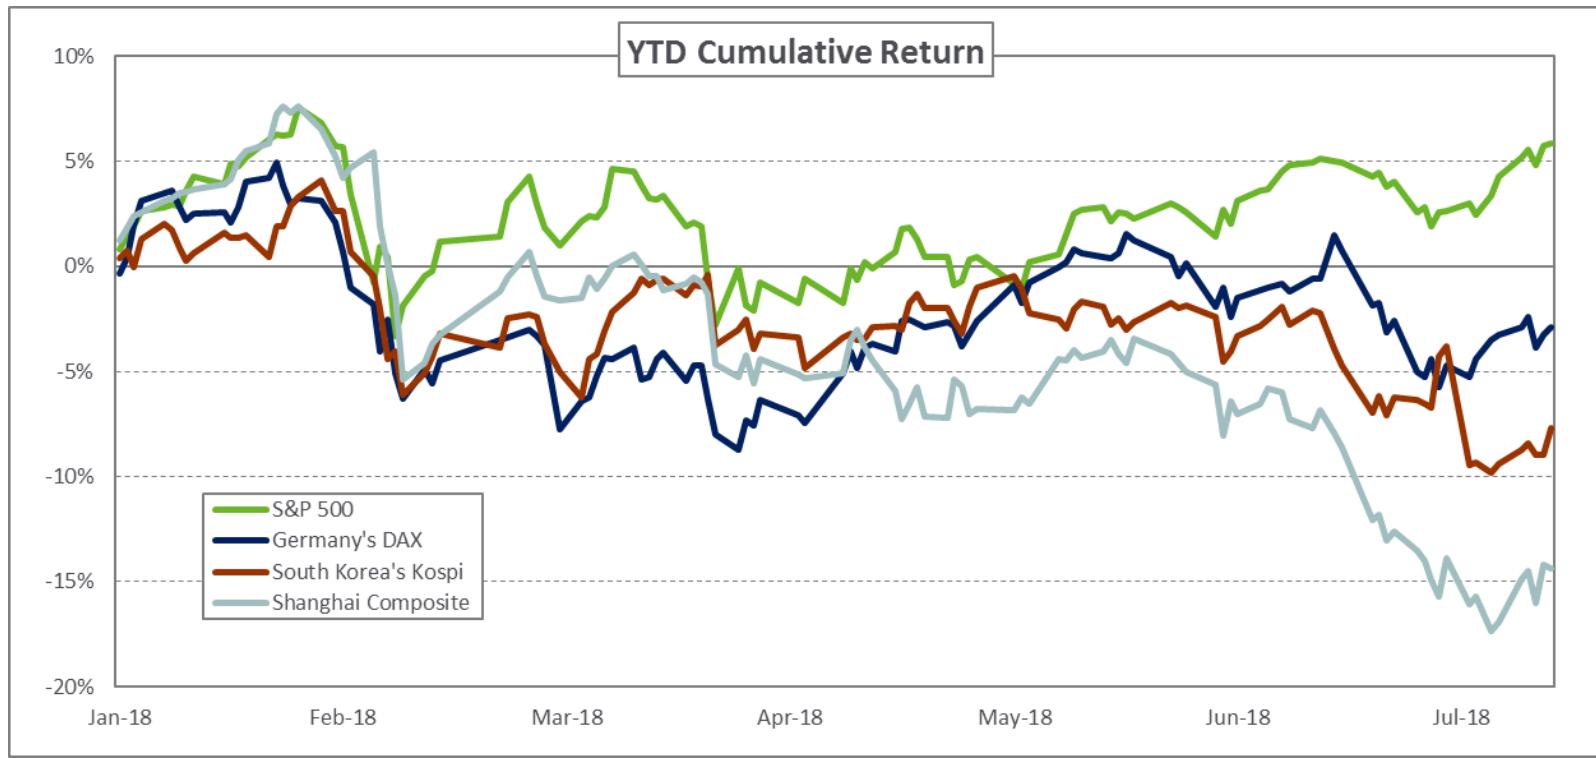

China's manufacturing base could allow them to cut off key parts of the global supply chain

Europe

The US and the EU have a trade partnership worth over \$1.1T annually

Tensions have escalated – leading the EU to respond with retaliatory measures on American products such as motorcycles and denim

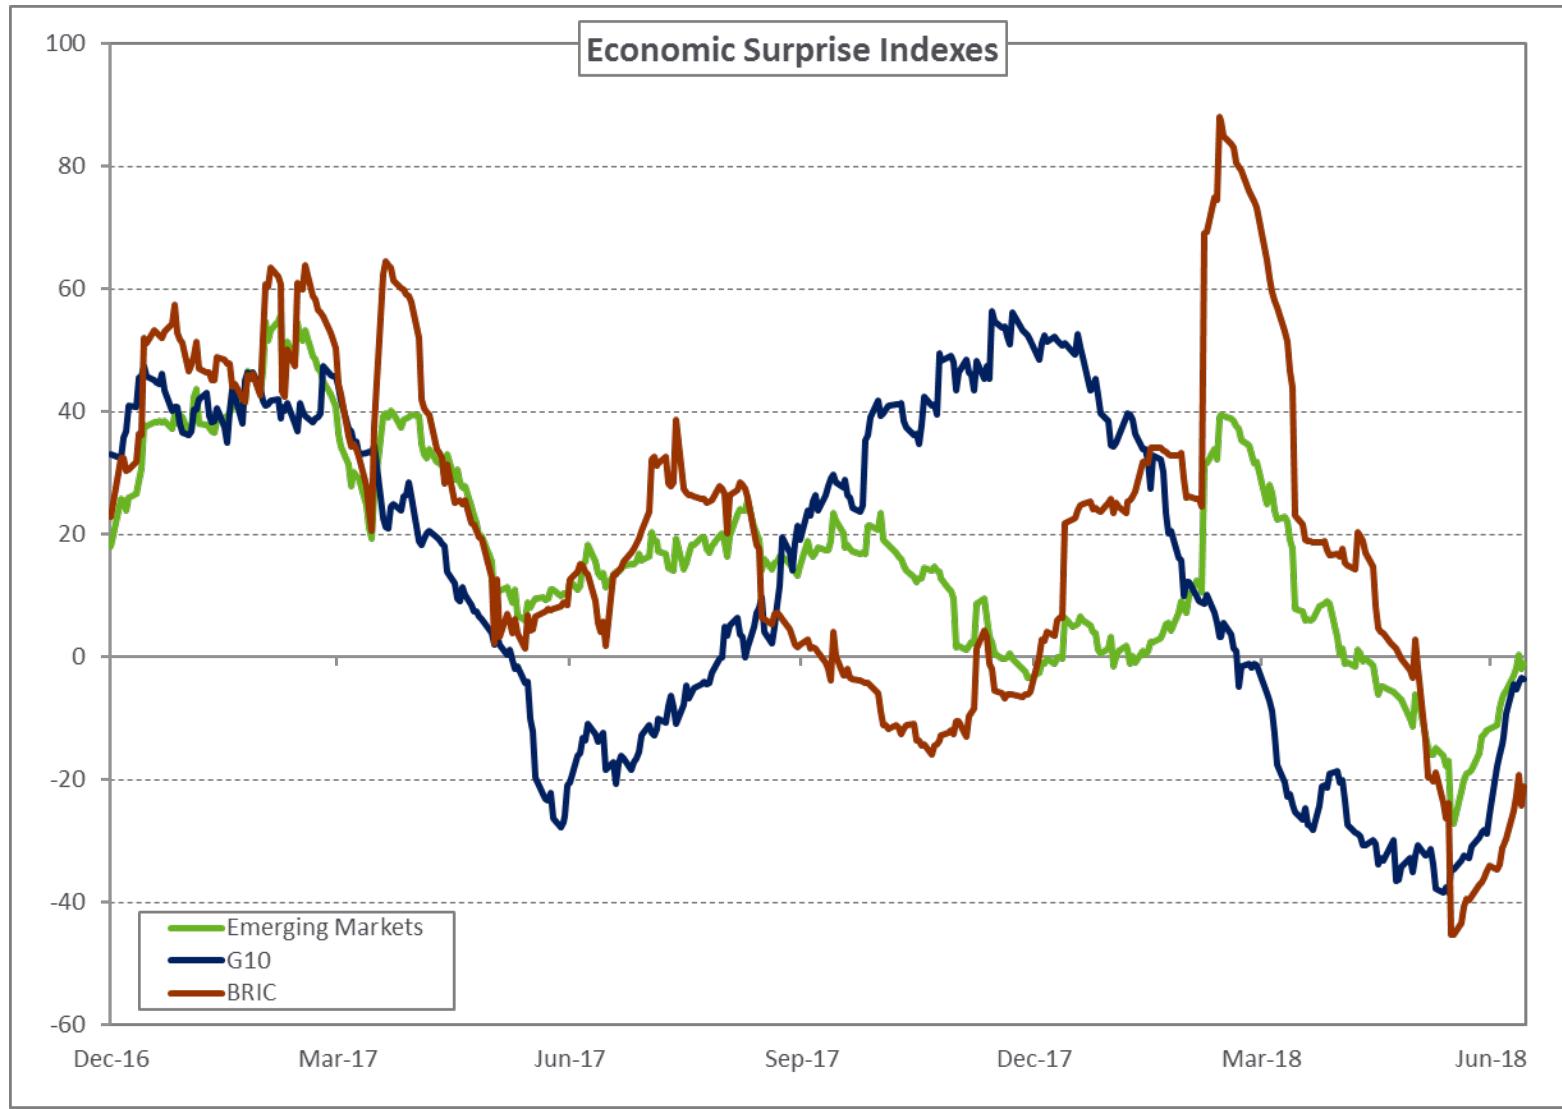

GLOBAL EQUITIES IN 2018

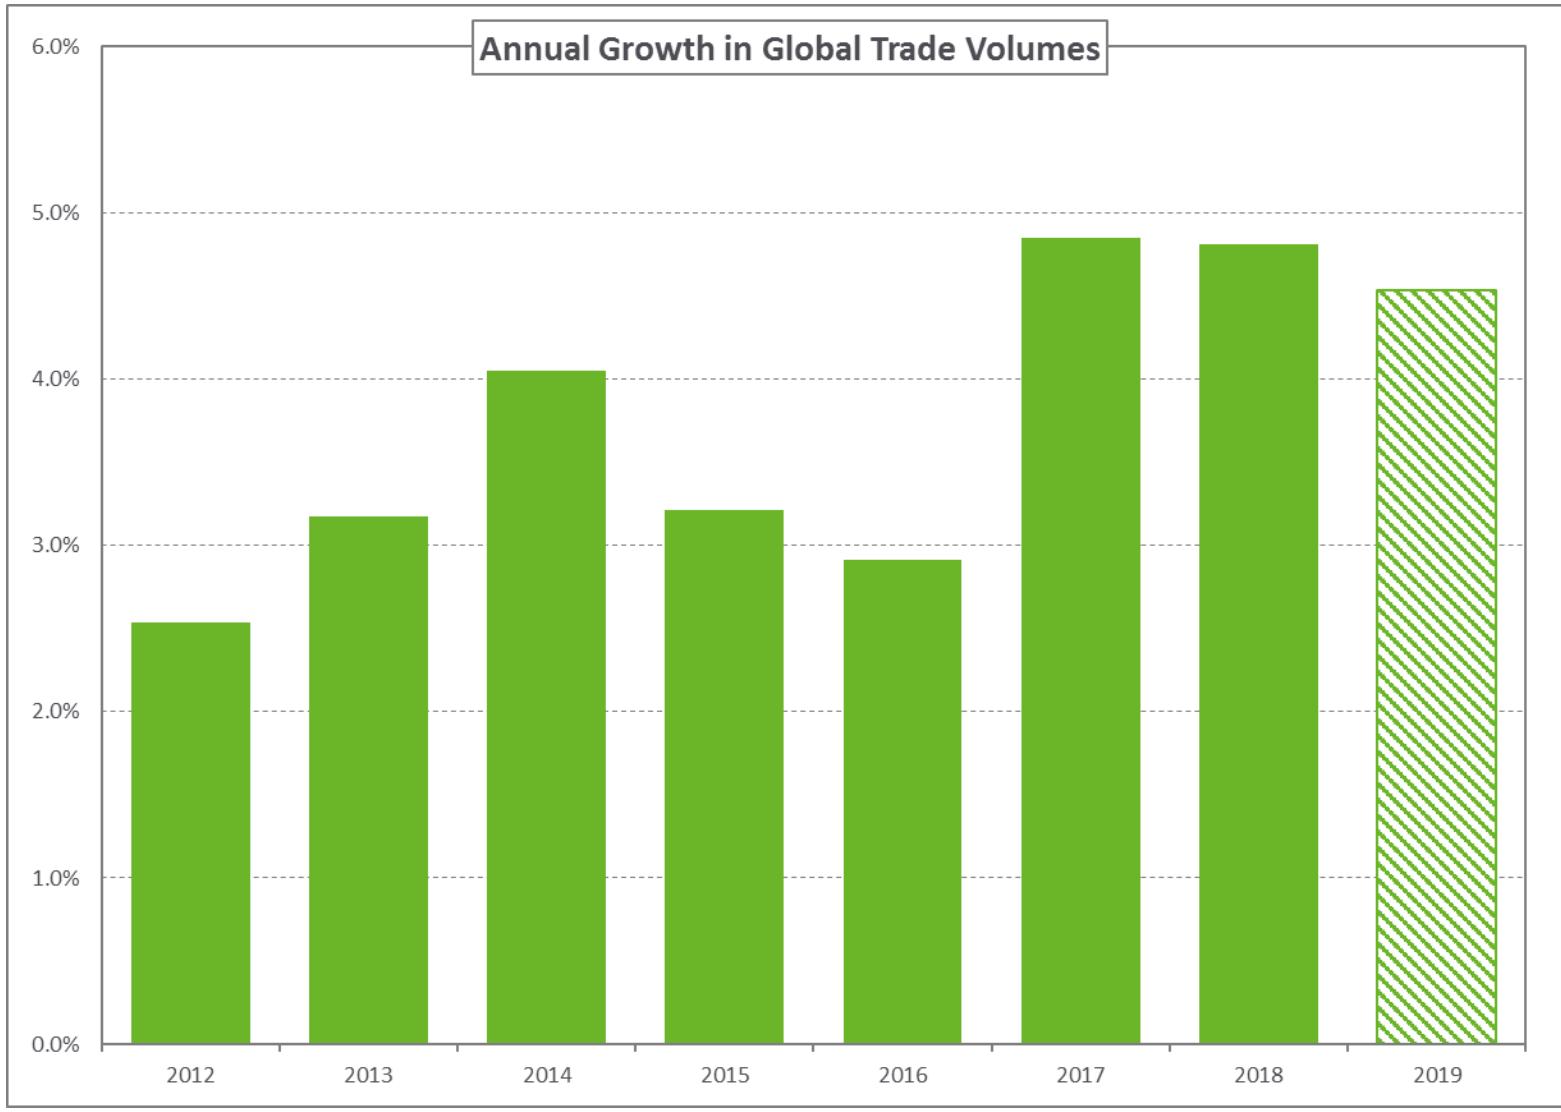

Source: S&P, Russell, Bloomberg, NEPC; Cumulative return calculated through 07/16/2018

- **With the US economy performing well, 2018 was set to be a strong year for earnings even before the tax reform was enacted**
 - First quarter US corporate earnings reached near historic levels and earnings for 2018 are expected to increase 20% relative to the year prior as tax cuts offer a tailwind
- **International and emerging markets are also experiencing strong earnings growth, but have suffered from the negative sentiment associated with US-China trade tensions**
